## **Biology of the Three-Spined Stickleback (CRC Marine Biology Series)**

Highlighting the growing importance of the sticklebacks as a model species in emerging fields such as molecular genetics, genomics, and environmental toxicology, **Biology of the Three-Spined Stickleback** examines data from researchers who use studies of the stickleback to address a wide range of biological issues. This state-of-the-art volume is the first comprehensive review of the biological research on this important fish in more than a decade.

The book presents current knowledge on the geographic and genetic variation of the ubiquitous three-spined stickleback and explores the possibility of any subdivision within currently recognized stickleback species. It provides a summary of important new molecular tools available, and how these tools can be used to study the genetic architecture and molecular basis of evolutionary change in different stickleback populations around the world. The book also lays out their physiology, historical factors, geographic distribution, and describes the features of their biology that seem to promote rapid speciation. It covers reproductive behavior in chronological order, and the mechanisms and selection pressures behind the activities that sticklebacks perform during the different phases of the breeding season.

Full of cutting-edge data, the book discusses the *umwelt* of the three-spine stickleback, with particular reference to how that world interacts with and shapes intraspecific communication during the breeding season. It covers developments in stickleback reproductive physiology from 1991 onward and summarizes studies performed — mainly within the fields of behavioral ecology and physiology — on some of the less-studied stickleback species. The book touches on the biology, in particular the behavioral ecology, of the 15-spined stickleback. Emphasizing the importance of the sticklebacks to a variety of disciplines, this book presents information that is both extensive and authoritative.

### **From reader reviews:**

#### **Christine Clute:**

The e-book with title Biology of the Three-Spined Stickleback (CRC Marine Biology Series) contains a lot of information that you can study it. You can get a lot of help after read this book. This specific book exist new information the information that exist in this guide represented the condition of the world right now. That is important to you to find out how the improvement of the world. That book will bring you in new era of the the positive effect. You can read the e-book with your smart phone, so you can read this anywhere you want.

#### **Roberto Senn:**

People live in this new time of lifestyle always make an effort to and must have the spare time or they will get lots of stress from both everyday life and work. So , once we ask do people have time, we will say absolutely without a doubt. People is human not only a robot. Then we question again, what kind of activity are there when the spare time coming to you actually of course your answer will unlimited right. Then ever try this one, reading guides. It can be your alternative inside spending your spare time, the particular book you have read is Biology of the Three-Spined Stickleback (CRC Marine Biology Series).

#### **Debra Yarbrough:**

Reading a book to become new life style in this yr; every people loves to read a book. When you learn a book you can get a large amount of benefit. When you read ebooks, you can improve your knowledge, simply because book has a lot of information onto it. The information that you will get depend on what forms of book that you have read. In order to get information about your review, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, such us novel, comics, in addition to soon. The Biology of the Three-Spined Stickleback (CRC Marine Biology Series) will give you a new experience in looking at a book.

#### **Ora Barbour:**

What is your hobby? Have you heard that will question when you got pupils? We believe that that problem was given by teacher to the students. Many kinds of hobby, Everybody has different hobby. And you know that little person like reading or as looking at become their hobby. You must know that reading is very important along with book as to be the point. Book is important thing to increase you knowledge, except your personal teacher or lecturer. You find good news or update about something by book. A substantial number of sorts of books that can you choose to use be your object. One of them is this Biology of the Three-Spined Stickleback (CRC Marine Biology Series).
