## **Robotics and Automation in the Food Industry: Current and Future Technologies (Woodhead Publishing Series in Food Science, Technology and Nutrition)**

The implementation of robotics and automation in the food sector offers great potential for improved safety, quality and profitability by optimising process monitoring and control. Robotics and automation in the food industry provides a comprehensive overview of current and emerging technologies and their applications in different industry sectors.

Part one introduces key technologies and significant areas of development, including automatic process control and robotics in the food industry, sensors for automated quality and safety control, and the development of machine vision systems. Optical sensors and online spectroscopy, gripper technologies, wireless sensor networks (WSN) and supervisory control and data acquisition (SCADA) systems are discussed, with consideration of intelligent quality control systems based on fuzzy logic. Part two goes on to investigate robotics and automation in particular unit operations and industry sectors. The automation of bulk sorting and control of food chilling and freezing is considered, followed by chapters on the use of robotics and automation in the processing and packaging of meat, seafood, fresh produce and confectionery. Automatic control of batch thermal processing of canned foods is explored, before a final discussion on automation for a sustainable food industry.

With its distinguished editor and international team of expert contributors, Robotics and automation in the food industry is an indispensable guide for engineering professionals in the food industry, and a key introduction for professionals and academics interested in food production, robotics and automation.

- Provides a comprehensive overview of current and emerging robotics and automation technologies and their applications in different industry sectors
- Chapters in part one cover key technologies and significant areas of development, including automatic process control and robotics in the food industry and sensors for automated quality and safety control
- Part two investigates robotics and automation in particular unit operations and industry sectors, including the automation of bulk sorting and the use of robotics and automation in the processing and packaging of meat, seafood, fresh produce and confectionery

### **From reader reviews:**

#### **Christopher Hairston:**

Why don't make it to be your habit? Right now, try to prepare your time to do the important behave, like looking for your favorite reserve and reading a book. Beside you can solve your short lived problem; you can add your knowledge by the publication entitled Robotics and Automation in the Food Industry: Current and Future Technologies (Woodhead Publishing Series in Food Science, Technology and Nutrition). Try to stumble through book Robotics and Automation in the Food Industry: Current and Future Technologies (Woodhead Publishing Series in Food Science, Technology and Nutrition) as your pal. It means that it can for being your friend when you truly feel alone and beside that of course make you smarter than in the past. Yeah, it is very fortuned for you. The book makes you much more confidence because you can know everything by the book. So , we need to make new experience in addition to knowledge with this book.

#### **Jacob King:**

Do you considered one of people who can't read satisfying if the sentence chained inside straightway, hold on guys this specific aren't like that. This Robotics and Automation in the Food Industry: Current and Future Technologies (Woodhead Publishing Series in Food Science, Technology and Nutrition) book is readable through you who hate those perfect word style. You will find the facts here are arrange for enjoyable reading through experience without leaving even decrease the knowledge that want to offer to you. The writer involving Robotics and Automation in the Food Industry: Current and Future Technologies (Woodhead Publishing Series in Food Science, Technology and Nutrition) content conveys thinking easily to understand by many people. The printed and e-book are not different in the articles but it just different such as it. So , do you even now thinking Robotics and Automation in the Food Industry: Current and Future Technologies (Woodhead Publishing Series in Food Science, Technology and Nutrition) is not loveable to be your top listing reading book?

#### **Santa McNabb:**

A lot of people always spent their own free time to vacation as well as go to the outside with them loved ones or their friend. Did you know? Many a lot of people spent they free time just watching TV, or playing video games all day long. If you need to try to find a new activity honestly, that is look different you can read some sort of book. It is really fun for yourself. If you enjoy the book that you simply read you can spent 24 hours a day to reading a guide. The book Robotics and Automation in the Food Industry: Current and Future Technologies (Woodhead Publishing Series in Food Science, Technology and Nutrition) it is rather good to read. There are a lot of those who recommended this book. They were enjoying reading this book. When you did not have enough space bringing this book you can buy the e-book. You can m0ore quickly to read this book through your smart phone. The price is not very costly but this book has high quality.

**Jennifer Howard:**

As we know that book is important thing to add our information for everything. By a guide we can know everything we would like. A book is a group of written, printed, illustrated or blank sheet. Every year seemed to be exactly added. This publication Robotics and Automation in the Food Industry: Current and Future Technologies (Woodhead Publishing Series in Food Science, Technology and Nutrition) was filled regarding science. Spend your spare time to add your knowledge about your scientific research competence. Some people has various feel when they reading the book. If you know how big benefit of a book, you can feel enjoy to read a reserve. In the modern era like currently, many ways to get book you wanted.
