**Methods in Cellular Immunology, Second Edition** Rafael Fernandez-Botran, Vaclav Vetvicka

A step-by-step guide to commonly used procedures, Methods in Cellular Immunology addresses both human and murine models, in addition to such topics as PCR and apoptosis. The basic format of the original version has been maintained, and the goal remains the same: to make it a useful and easy-to-use tool for investigators employing cellular immunological techniques in their research, regardless of whether or not immunology is their main area of expertise. It provides information about manufacturers and commercial sources of chemicals and reagents and a comprehensive list of references, allowing readers to refer back to the original information and/or techniques.
